

MOHAMMAD RIZQY AKMALUDDIN

PHP WEB DEVELOPER

PROFESSIONAL SUMMARY

Computer Science student at Bina Nusantara University with strong practical experience in full-stack PHP web development. Skilled in building scalable and visually appealing web applications using Laravel, Native PHP, JavaScript, and MySQL, with a solid understanding of database design and UI/UX principles.

WORK EXPERIENCE

CV KILAU KONSTRUKSI | WEB DEVELOPER | CONTRACT

Tangerang, Indonesia | Feb 2025 - Apr 2025

- Created a responsive company profile site with detailed case studies, attracting 100+ unique visitors in the first month.
- The website's strong credibility and professional presentation contributed to the company winning two construction tenders in the same year.
- Developed a web-based internal financial management system to optimize financial operations.

FIVERR | UI/UX DESIGNER | FREELANCE

Tangerang, Indonesia | Des 2023 - Jan 2025

- Successfully delivered UI/UX designs for over 10 international clients with consistent 5-star ratings, enhancing project delivery efficiency by 20%.

RELATED PROJECTS

LINKEDIN-LIKE WEBSITE | FULL-STACK DEVELOPER

Individual project | Aug 2025 - Oct 2025

- Developed and deployed a professional networking web app using Laravel, MySQL, and Bootstrap, implementing structured MVC architecture for scalable and maintainable backend.
- Designed and implemented a new component library for development, decreasing code duplication by 25% and ensuring design consistency across the entire platform.
- Designed a responsive and modern UI with Blade templating, reusable layouts, and interactive JavaScript.
- Conducted unit testing with PHPUnit to ensure backend reliability and maintain code quality across major modules.

E-LEARNING WEBSITE | FULL-STACK DEVELOPER

Individual project | May 2025 - Jul 2025

- Built a course-based learning platform using Laravel, MySQL, and Bootstrap, implementing role-based authentication and structured module management.
- Integrated payment, course purchase, and progress tracking systems with secure backend logic and clean MVC workflow.

E-COMMERCE WEBSITE | BACKEND DEVELOPER

Team project | Jan 2025 - Feb 2025

- Developed a full e-commerce system using Native PHP, MySQL, and Vanilla CSS, covering cart management, product listings, and checkout workflows.
- Implemented modular PHP code and reusable layouts for efficient and maintainable backend development.
